## Profile

---

I'm a dedicated developer with a passion for coding that began with C and Python, and has evolved into .NET backend development. Despite my relatively limited experience in .NET, I bring a strong foundation in programming principles and a knack for quick adaptation. I'm enthusiastic about honing my skills and contributing to innovative projects in the .NET ecosystem.

## Professional Experience

---

2024/02 – present

### .NET Backend developer

*Azhar Inc* [🔗](#)

As a .NET C# backend developer, I designed and implemented core project functionalities, ensuring seamless data management and system performance. I collaborated with frontend teams and contributed to code reviews, ensuring high-quality software delivery.

2023/09 – 2024/02

### .NET Software developer

*Neetron Inc* [🔗](#)

Collaborated with Neetron Inc on various C# .NET projects.  
Delivered high-quality software solutions meeting client requirements.  
Demonstrated expertise in C# .NET development.  
Continuously improved technical skills and stayed updated with industry trends.

## Projects

---

### Nabeey [🔗](#)

*Article Sharing Platform*

In my initial project hosted on the Play Store, I played a pivotal role in ensuring the seamless integration of Islamic videos, articles, and other related content. As part of my responsibilities, I meticulously reviewed pull requests, conducted thorough code reviews, and efficiently merged branches to maintain a cohesive development process. I contributed to the project's success in delivering valuable Islamic resources to users.

### Medic [🔗](#)

*Hospital CRM system*

I independently conceptualized, developed, and deployed a comprehensive CRM system tailored for hospitals. This solution enabled efficient management of patient data and facilitated seamless booking of doctor appointments. Leveraging my expertise, I implemented the entire project from scratch and successfully deployed it on an Ubuntu server, ensuring smooth functionality and reliability.

### BekGym [🔗](#)

*Gym Course Program*

Developed a robust backend for a gym program that sells courses to gym members for learning exercises and gym routines. The project, deployed with Nginx, leverages .NET 8 and Entity Framework Core, integrating various APIs to ensure smooth operation. Responsibilities included designing and implementing the backend architecture, integrating Entity Framework Core for efficient data management, deploying the application using Nginx for high availability and performance, and developing and consuming APIs to facilitate seamless interaction between components.

**Skills**

---

**.NET | C#**  
ORM (Entity Framework), LINQ, OOP, SOLID, KISS, DRY, YAGNI

**Databases**  
MSSQL Server, PostgreSQL, MySQL

**Technologies**  
ASP.NET Core Web API, WPF, Postman, N- Tier Architecture, Git/GitHub, MVC, Nginx

**Other languages**  
Python, C

**Education**

---

2023/04 – 2023/10      **Bootcamp .NET Backend**  
Chilanzar, Uzbekistan      *Najot Ta'lim* 

2022/10 – 2023/03      **Bootcamp Foundation**  
Chilanzar, Uzbekistan      *Najot Ta'lim* 

**Languages**

---

**English**  
Able to comfortably work in environments and collaborate with international teams.

**Russian**  
Proficient in understanding spoken and written, basic conversational ability.
